Carrera: Ing. Sistemas Computacionales

Herramienta para generar plan de proyectos

Lo primero que se hace es descargar el process dashboard

Despues se instala process dashboard

The screenshot shows a web browser window with the address bar displaying `http://localhost:3000/dash/teamStartTeamNode.shtm`. The page title is "Team Project Setup Wizard". The main heading is "Select Project Name". Below the heading, there is a text input field for "Project name" containing the text "SIS_ACT_EXTRA". A paragraph of text explains that a team project must be created to coordinate work. Below this, there is a text input field for "Project group" containing the text "/Proyecto", followed by a "Browse..." button. The browser's tab bar shows "Team Project Setup Wizard".

Ahora hay que crear un nuevo proyecto y escribir el nombre

The screenshot shows a web browser window with the address bar displaying `http://localhost:3000/Proyecto/SIS_ACT_EXTRA//PDSSD/setup/teamDirectory.shtm`. The page title is "Team Project Setup Wizard". The main heading is "Select Team Directory". Below the heading, there is a paragraph of text explaining the purpose of the team directory. A paragraph of text explains that the team directory must be accessible, readable, and writable by all team members. A paragraph of text explains that the Process Dashboard was designed to use shared network directories. A paragraph of text explains that any number of projects can share the same team directory. A paragraph of text explains that if the members of your team are predominately using the Microsoft Windows operating system, the use of a UNC path is strongly recommended. A paragraph of text explains that the directory below is provided as a suggested location for the team directory. A paragraph of text explains that the user should enter the full path to the appropriate network directory. Below this, there is a text input field for "Team Directory" containing the text "\\UNNNY\Campuseros". The browser's tab bar shows "Team Project Setup Wizard".

Despues creamos el directorio del process dashboard

http://localhost:3000/Proyecto/SIS_ACT_EXTRA/PDSSD/setup/teamConfirm.shtm Team Project Setup Wizard

/Proyecto/SIS_ACT_EXTRA

Confirm Choices

The process dashboard will create a team project using the settings below:

Process: Software System Development Project (Team)

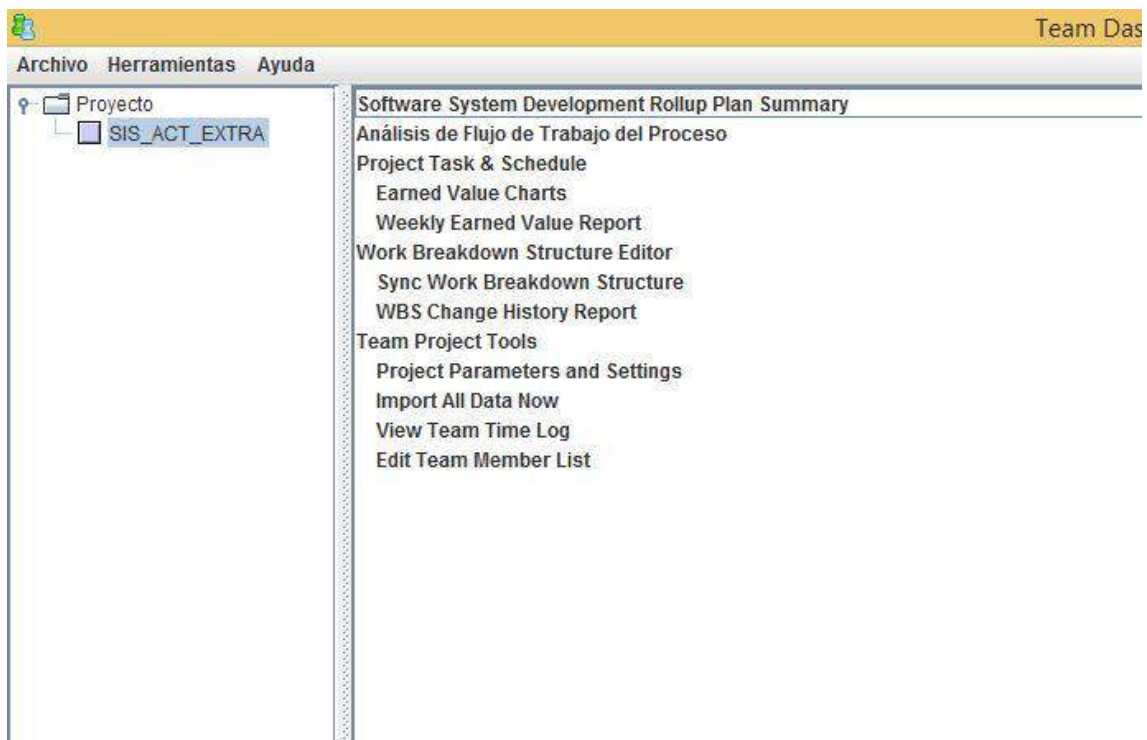

Team Data Location: \\JUNNY\Campuseros

Schedule Name: SIS_ACT_EXTRA

Review this information carefully. If any of this information is incorrect, press the "Back" button to make corrections.

If this information is correct, press the "Finish" button to create the team project.

Asi es como quedan los parametros de nuestro ´proyecto

Asi es como le aparece al administrador del team dashboard

Edit Team Member List

Name	Initials	Color	Hrs/Week	15/11/15	22/11	29/11	6/12	13/12
Aldring Ignacio Bueno López			12					
Victor Alfonso Domínguez SANC...			12					
Jonathan Valentín Pérez Lazalde			12					
Rogelio Lerma Pacheco			12					
Jaime Zepeda Galván			12					
			12					

Cancel Save

Ahora se da de alta a los miembros del equipo

despues el administrador tendra que mandar un link para que esten dados de alta los miembros del equipo

Asi es como aparece al final de la configuracion del team dashboard

Y como vemos el sistema ya esat dado de alta en nuestro team dashboard para se usado
